***Polio is back - can it ever  
be eradicated?***

**Prof. Manfred Green**  
**School of Public Health**  
**University of Haifa**

Prof Manfred Green is a globally renowned epidemiologist who has served in a variety of high level academic and public health service positions in Israel including: head of the Public Health Branch of the IDF, founding director of the Israel Center for Disease Control, head of the department of Epidemiology at TAU and head of the School of Public Health at the University of Haifa. He serves on a number of advisory committees in the Israeli Ministry of Health and is chairman of the polio eradication and polio emergency response committees. His field of research includes the study of sex differences in infectious diseases, the immune response to vaccines, adverse events following immunization, emerging infectious diseases and preparedness for bioterrorism. He has published widely in peer-reviewed professional journals.
